EDUCATION

B.Tech in Electronics and Communication Engineering (ECE), Minor in AI/ML *2022 – 2026*
Maharaja Agrasen Institute of Technology, IP University, Delhi
Class 12th (CBSE) – The Air Force School, Delhi (2022)

SKILLS

Languages: Python, JavaScript, TypeScript, CSS

Backend: FastAPI, Node.js (basic), RESTful APIs, SQLite, Firebase (Firestore)

Frontend: React Native (Expo), Bootstrap, Tailwind CSS, Responsive UI Design

AI/ML: TensorFlow, OpenCV, DeepFace, Computer Vision, Image Classification

Tools/Platforms: Git, GitHub, Postman, Firebase Auth, Google Fit API

Other: Full-Stack App Development, Data Modeling, Version Control, API Integration, Model Deployment

PROJECTS

ATTEND-AI – Face Recognition-Based Attendance System

FastAPI, Python, OpenCV, DeepFace, SQLite

- Developed a web app for automating student attendance using facial recognition with 90%+ accuracy.
- Used DeepFace with cosine similarity for real-time face verification and logging.
- Included interfaces for registration, live detection, and CSV export.

SAHELI – AI-Driven Financial Literacy App

2nd Runner-up – Hansraj Innoverse

React Native, FastAPI, Firebase

- Created 10+ screen mobile app for AI-powered budgeting and planning.
- Integrated multilingual support (3+ languages), offline sync, and Firebase storage.
- Used FastAPI to deliver personalized savings insights.

SATVIK – AI-Powered Health & Wellness Tracker

Runner-up – ACM Hackathon

React Native, FastAPI, Google Fit, Firebase

- Built a health app with 12+ screens, syncing metrics via Google Fit (steps, calories, sleep).
- Integrated food detection AI model using FastAPI with 90%+ accuracy.
- Managed meals, activities, and stats via Firebase Auth and Firestore.

ORGANIC-AI – Eco-friendly product alternatives

Open Ai, Python

- **Developed Organic AI Full-Stack App:** Built a web app using Node.js, Express, and React to recommend eco-friendly products with OpenAI and OpenFoodFacts APIs.
- **Integrated AI for Product Recommendations:** Leveraged OpenAI API to provide sustainable product alternatives, enhancing user eco-conscious decision-making.

ACHIEVEMENTS

- **Runner-up, ACM Hackathon (1,200+ teams):** Developed SATVIK, a wellness app using CV and ML. (MARCH 2025)
- **2nd Runner-up, Hansraj Innoverse Hackathon (1,000+ teams):** Built Saheli, a financial literacy app.(MARCH 2025)
- **Top 1,000 / 100,000+, EY Techathon 5.0:** Created AI tools for budgeting and savings.
